The European Society of MusculoSkeletal Radiology is an educational, scientific Society concerned with advancement of the art and science of musculoskeletal radiology. To promote this mission, the ESSR has issued technical standards for ultrasound examination of joints, including the shoulder, the elbow, the wrist, the hip, the knee and the ankle. These US guidelines were first published in 2010.

Ultrasound - European Society of Musculoskeletal Radiology

Musculoskeletal (MSK) ultrasound performed by non-medical practitioners is a developing practice. The aim of this paper is: (1) to audit an experienced sonographer's (SJR) performance after one year's independent reporting against two experienced MSK radiologists (CJG, MC); and (2) to establish an audit standard against which such role development might be contrived.

Medical Education 2010: 44: 148|155 Objectives This study (a post-intervention assessment) was designed to assess the effectiveness of peer-assisted learning (PAL) using student-teachers (STs) with limited training to teach complicated technical skills for interpreting ultrasound images of the shoulder.. Methods Students in Years 3 and 4 of medical school were randomly assigned to two ...

Peer teaching: a randomised controlled trial using student ...

Musculoskeletal ultrasound is a musculoskeletal imaging technique that adds a different and complementary dimension of imaging evaluation to the traditional modalities of plain radiography, computerized tomography (CT), and magnetic resonance imaging (MRI). Recognized advantages of the modality include the ready availability of ultrasound equipment, the relatively low cost of the procedure compared with advanced imaging such as CT and MRI, and that the exam uses non-ionizing radiation.
