Enlightenment that were prominent in the American Founding, Holmes argues that today's liberalism has forsaken its American roots, incorporating

instead the authoritarian, anti-clerical, and anti-capitalist

prejudices of the radical and largely European Left. The result is a closing of the American liberal mind. Where once freedom of speech and expression were sacrosanct, today

liberalism employs speech codes, trigger warnings, boycotts, and shaming rituals to stifle freedom of thought, expression, and action. It is no longer appropriate to call it liberalism at all, but illiberalism—a set of ideas in politics,

reflects

authoritarian and

democratic values,
and which is
devising new

venerable tradition of liberalism, but to the American nation itself, which needs a viable liberal tradition that pursues social and economic equality while respecting individual liberties.

Today, these two systems are in conflict, and we all face the question of whether we can stop damaging our environment while still supplying the essential goods

this is a key means
