Biology, an authoritative text with a diverse author team, focuses on the process of evolution to explain biodiversity. The book emphasizes problem-solving and the scientific method in its approach to cutting-edge content. The use of historical and experimental approaches offers students not only a current view of the field, but more

biodiversity. The new 8th edition continues that tradition and advances into modern biology by featuring the latest in cutting edge content reflective of the rapid advances in biology. That same modern perspective was brought into the completely new art program offering readers a dynamic, realistic, and accurate, visual program. Entirely NEW Visual Program! The entire art program was redone involving a variety of specialists, artists, and medical illustrators who worked very closely with the author team to provide a phenomenal visual program for readers. This new art program focuses on providing images

that focus on difficult concepts and provide a clear, consistent, accurate and easy-to-follow visual explanation. Experimental Focus -- Another theme of Biology is that knowledge arises from experimental work that moves us forward. The use of historical and experimental approaches throughout allow the student to not only see where the field is now, but more importantly, how we arrived there. The authors have tried to keep as much historical context as possible and provide information within an experimental framework throughout the text. Strengthened Evolutionary Emphasis -- From the inception

of Biology, evolution has been the underlying theme of the text. The Eighth edition has been written with an even greater focus on evolution, with a significant increase of coverage at the molecular level, a good example is the two new chapters dedicated to molecular evolution. This emphasis creates more depth, balancing the amount of evolutionary coverage throughout. Includes print student edition

The Living World is often considered a

student favorite. George Johnson has written this introductory biology textbook from the ground up to be an engaging and accessible learning tool with an emphasis on "how things work and why things happen the way they do". The Living World focuses on concepts rather than terminology and technical information, and features a straight forward, clear writing style and a wide variety of media assets to enhance the content of the textbook. George believes that 'relevancy is the window' in which students can learn biology. This is shown through every chapter of this 10th edition, which is focused directly on the

relevance of its content to today's students. When the discussion of a topic is linked to a student's own experience, it does not seem so unapproachable, and the utility of learning it is far easier to accept.
