The past thirty years have seen a rapid expansion of testing, exposing students worldwide to tests that are now, more than

Access Free Business

ever, standardized and linked to high-stakes outcomes. The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide. The embedded nature and normative power of high-stakes standardized

Business

Studies across national contexts can be understood as a global testing culture. The global testing culture permeates all aspects of education, from financing, to parental involvement, to teacher and student beliefs and practices. The reinforcing nature of the global testing culture leads to an environment

where testing becomes synonymous with accountability, which becomes synonymous with education quality. Underlying the global testing culture is a set of values identified from the increasing literature on world culture. These include: education as a human right, academic intelligence, faith in science,

decentralization, and neoliberalism. Each of these values highlights different aspects of the dialogue in support of high-stakes standardized testing. The wide approval of these values and their ability to legitimate various aspects of high-stakes testing reinforces the taken-for-granted notion that such tests are

effective and

appropriate education

practices. However, a

large body of literature

emphasizes the negative

unintended

consequences –

teaching to the test,

reshaping the testing

pool, the inequitable

distribution of school

resources and

teachers ' attention,

and reconstructing the

role of the student, teacher, and parent — commonly found when standardized, census-based tests are combined with high-stakes outcomes for educators or students. This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe

Access Free

Business

how the culture manifests in national contexts. The volume makes it clear that testing, per se, is not the problem. Instead it is how tests are administered, used or misused, and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and

It is no easy task to

adopt a child, especially across different races, nor is it easy to be adopted. Jake and Nkanyiso have to work much harder than either of them probably expected to become a family of two. Just as they are becoming settled after some trials, Nkanyiso informs his adopted father that a male teacher has been

sexually harassing him at school. Jake does his best to protect his adopted son, but neither of them is really prepared for the onslaught when Jake complains to the school. Each of them has to deal with the others different world view. Jakes respect for Zulu customs does not extend to funding Nkanyisos
