running poorly, fig 7. It must be remembered that carburetor jetting is determined by the throttle position, not engine speed. If the engine is having troubles at low rpm (idle to 1/4 throttle), the pilot system or slide valve is the likely problem.

Mikuni carburetor operation and tuning

If the fuel level is set too high in the float chamber, a rich mixture will result. A rich condition may be caused by a dirty or clogged air filter (s). Also keep in mind that both altitude and humidity effect your engine's performance. Carburetor adjustments should be done with engine at normal operating temperature.

Diagnose Motorcycle Carb Issues on the Fly.

Accelerate and shift through all gears at the proper RPM. A properly tuned and carbureted engine will accelerate smoothly and quickly through the gears. If the main jet is too rich, acceleration will feel slow or stuttery. Close the throttle from full to about  $\frac{1}{4}$  open when RPMs are over 4500.

alternating between the 2 or 4, until highest vacuum is achieved. Be sure you keep all 2 or 4 screws even. You can also do these adjustments without a vacuum gauge. The adjustments are the same except you will adjust to highest engine RPM at idle.

Carburetor Technical Support - Holley

When jetting a motorcycle carburetor, it is always best to return the carburetor back to the factory settings per the factory service manual (or equivalent aftermarket publication like Clymer or Haynes). I cannot stress this enough, nearly ALL motorcycles produced have a service manual available in some form either used or new, digital or print. Before

attempting ANY sort of repair it is best to obtain a service manual for proper specifications for your particular motorcycle.

carburetor Jetting - The Junk Man's Adventures  
The basic secret of carb function is that inside each carb are thousands of tiny gnomes; each with a small bucket. As you open the throttle, more of these gnomes are allowed out of their house and into the float bowl, where they fill the buckets and climb up the carb's passages to the intake, where they empty their buckets into the air stream.
