~~Common Neonatal
Drug Calculation Test
—1x1px.me~~

Since the drops per

Get Free Common

mL is 20, and there are 60 minutes in an hour, you'll calculate an answer in drops per mL by multiplying the fluid per hour by $20/60 = 1/3$. So one-third of your mL per hour (150mL) should be your answer – i.e. 50mL. • Remember drip rate is calculated in drops per minute.
