This book introduces readers to the fundamentals of artificial neural networks, with a special emphasis on evolutionary algorithms. At first, the book offers a literature review of several well-regarded evolutionary algorithms, including particle swarm and ant colony optimization, genetic algorithms and biogeography-based optimization. It then proposes evolutionary version of several types of neural networks such as feed forward neural networks, radial basis function networks, as well as recurrent neural networks and multi-layer perceptron. Most of the challenges that have to be addressed when training artificial neural networks using evolutionary algorithms are discussed

in detail. The book also demonstrates the application of the proposed algorithms for several purposes such as classification, clustering, approximation, and prediction problems. It provides a tutorial on how to design, adapt, and evaluate artificial neural networks as well, and includes source codes for most of the proposed techniques as supplementary materials.

"This revised and updated edition of Construction Equipment Management fills a gap on this subject by integrating both conceptual and hands-on quantitative knowledge on construction equipment into a process that facilitates student learning. The book is divided into three sections: Introductory Concepts Equipment Types Advanced Concepts The introductory section summarizes interdisciplinary concepts that are necessary to ground student's learning on construction equipment management, including both engineering and economics. The second section consist of 16 chapters each covering a different type of construction equipment and associated methods of use. The third section introduces more advanced concepts including operational analysis, economic management and safety and environmental management. This allows the book to be used on numerous courses at different levels to prepare graduates to apply skills on construction equipment when planning for a new project, estimating its costs, and monitoring field operations. Organized around the major categories of construction equipment, including both commercial and heavy civil examples, case studies, and exercises, this textbook will help students develop independence in applying concepts to hands-on scenarios. A companion website provides an instructor manual, solutions, additional examples, lecture slides, figures and diagrams"--

Standard ASCE/SEI 19-16 provides requirements for the structural design, fabrication, and installation of cables for use as static structural elements to support and brace buildings and other cable-supported structures.

Why do people choose the careers they do? What factors cause people to be satisfied with their work? No single work did more to make concepts like motive, goal incentive, and attitude part of the workplace vocabulary. This landmark work, originally published in 1964, integrates the work of hundreds of researchers in individual workplace behavior to explain choice of work, job satisfaction, and job performance. Includes an extensive new introduction that highlights and updates his model for current organization behavior educators and students, as well as professionals who must extract the highest levels of productivity from today's downsized workforces.

MOBILE CRANE INSPECTOR TRAINING STUDENT MANUAL

In part one of Destiny and Trent, some light was shed on Trent and what he did to earn his extra cash on the side. We also saw Julissa wasn't as good of a friend to Jamika as she claimed to be. In this final installment, it's about to get turned upside down! Trent's past screw-ups come back to bite him in the ass when he least expects it. Destiny has the tough decision to make of whether or not to forgive Trent. Jamika sees another side of Eric, a side that he thought was buried. But after an unfortunate incident happens to him, he is forced to resurrect the old Eric with the help of his brother! So who's about to find love and happiness, who's about to be forgiven. And who's about to get a visit from the Grim Reaper? Find out whose hood love stays standing in this final installment of Destiny and Trent!

Mobile Crane Support Handbook is a comprehensive reference that is focused exclusively on the design and engineering of supports for mobile crane installations. Written by one of the leading lifting specialist engineers, this book addresses the full range of subjects needed for the engineering of mobile crane support in the construction job site.

PERFECT BOUND, GORGEOUS SOFTBACK WITH SPACIOUS RULED PAGES. LOG INTERIOR: Click on the LOOK INSIDE link to view the Log, ensure that you scroll past the Title Page. Record Page numbers, Subject and Dates. Customize the Log with columns and headings that would best suit your need. Thick white acid-free paper reduces the bleed-through of ink. LOG EXTERIOR COVER: Strong, beautiful paperback. BINDING: Professional trade paperback binding. The binding is durable; pages will remain secure and will not break loose.
